Professional architect with over 30 years' experience, consistently pursuing design excellence, and specialising in environmentally sustainable and community-based approach. Promoted sustainability in many fora, including 12 conference papers, 34 invited lectures, and 26 podium presentation, mainly keynotes. Recurrent participation in architectural education, competition adjudications and community initiatives related to sustainability.

General interests range widely: architecture, art, design, the creative process, craft – contemporary and traditional, textiles & textile crafts, indigenous culture, anthropology, archaeology, agriculture, history and natural sciences, including ecology, ecological restoration, regenerative design, social and climate justice.

Interested in increased involvement in education, particularly related to sustainability, without relinquishing professional practice, as well as consolidation ongoing practical research over course of career.
